

## **INTRODUCTION**

Can you confirm that you are feeling well and are able to use a computer today?

This study is going to be in two parts. First, you will use the website for 10 minutes, and will be free to ask questions at any time. You can also stop whenever you want. I will be taking notes about how you use the website in this time.

Next I will ask you to answer a short quiz about the information presented to you in the website. In this time you will not be allowed to ask questions.

Do you understand this process?

Do you consent to me using data about how you used the website and how you answered the questionnaire?

## **DEBRIEF**

Thank you for taking part in my study. Do you still feel well after using the website?

Do you still consent to me using the data from the observation and questionnaire?
